

# NEW UNIFIED ADAPTER FOR A COMBINE AND A FORAGE HARVESTER

## "QUICK UP"

### DESIGNED FOR ANY ATTACHMENT NEEDED

The new module adapter "*Quick up*" is unique in it's kind - it allows the maize header to be easily attached to forage and combine harvesters.

It's central part is suited to all the models of forage and combine harvesters. The gearboxes are inserted in the oil-bath, which guarantees constant lubrication.

# ALL-IN-ONE ADAPTER FOR YOUR CORN HEAD

Following the necessity in the transmission suitable to both, combine and forage harvesters, CAPELLO introduces the one, which is able to respond to the most critical needs of its clients. The "Quick up" modular adapter went through the most extreme working conditions and demonstrated its ability to maintain the unrivalled performance of the Capello heads and ensure an optimal crop flow.
